

SANGHYUN SON

 github.com/SonSang  sonsang.github.io/about/  shh1295@gmail.com

 Maryland, United States  240-726-3598

EDUCATION

University of Maryland, United States <i>PhD Student in Computer Science</i>	<i>Sep 2021 - Present</i>
Seoul National University, South Korea <i>Master of Science in Computer Science and Engineering</i>	<i>Mar 2019 - Aug 2021</i>
Seoul National University, South Korea <i>Bachelor of Arts in Archaeology</i> <i>Bachelor of Science in Computer Science and Engineering</i>	<i>Mar 2012 - Feb 2019</i> <i>Summa cum laude</i>

INTERESTS

Computer Graphics, Reinforcement Learning, Computer Simulations, AR/VR, Game Engine, etc.

TECHNICAL SKILLS

Programming:	Proficient in C, C++, Python / Conversant with C#
Software & Tools:	Graphics: OpenGL, WebGL GPU Programming: CUDA, OpenCL Game : Unity Engine, Unreal Engine Web : Django, React

MASTER THESIS

Sang-Hyun Son, *Efficient Geometric Algorithms Using Osculating Toroidal Patches*, 2020.

BACHELOR THESIS

Sang-Hyun Son, *Analysis of Hunter-Gatherer Subsistence Strategy with Computer Simulation*, 2018 (Korean)
Sang-Hyun Son, *Bisector Surface Construction for Two Bicubic Bezier Surfaces*, 2018 (Korean)

PUBLICATIONS

Sang-Hyun Son, Myung-Soo Kim, Gershon Elber, *Precise Hausdorff Distance Computation for Freeform Surfaces Based on Computations with Osculating Toroidal Patches*, Computer Aided Geometric Design (International Conference on Geometric Modeling and Processing 2021)
Youngjin Park, **Sang-Hyun Son**, Myung-Soo Kim, Gershon Elber, *Surface-Surface-Intersection Computation Using a Bounding Volume Hierarchy with Osculating Toroidal Patches in the Leaf Nodes*, Computer Aided Design (Solid and Physical Modeling 2020)
Sang-Hyun Son, Seung-Hyun Yoon, Myung-Soo Kim, Gershon Elber, *Efficient Minimum Distance Computation for Solids of Revolution*, Computer Graphics Forum (Eurographics 2020)
Sang-Hyun Son, Seung-Hyun Yoon, Myung-Soo Kim, *Computing minimum distance between surfaces of revolution using spherical shell tree*, Korean Computer Graphics Society 2019 (Korean) **Best Paper Award**

RESEARCH EXPERIENCE

UMD : GAMMA Lab Supervised by Ming C. Lin - Working on a scalable and differentiable traffic simulation that is based on a physical law	MD, United States <i>Sep 2021 - Present</i>
SNU : 3D Modeling and Processing Lab Supervised by Myung-Soo Kim - Developed a novel algorithm to bound freeform parametric surfaces with toroidal patches and enhanced the precision and speed of Hausdorff distance computation algorithm between the surfaces	Seoul, Korea <i>Mar 2019 - Present</i>

- Developed an algorithm to solve inverse problem to retrieve parameters for freeform parametric surfaces and volumes
- Developed an algorithm to bound freeform surfaces with Rectangle-Swept Spheres(RSS) and contributed to the acceleration of surface-surface intersection algorithm
- Developed an algorithm to conduct 3D shape retrieval using spherical bounding volume hierarchies
- Developed a novel algorithm to find minimum distance between toroidal patches and accelerated minimum distance computation algorithm between solids of revolution
- Developed an algorithm to bound surfaces of revolution with spherical shells and accelerated minimum distance computation algorithm between surfaces of revolution
- Developed a GPU algorithm to compute 3D medial axis, or bisector, of two bicubic Bezier surfaces

INDUSTRY EXPERIENCE

Smilegate

Game Engine Programmer (Intern)

Pangyo, Korea

July 2018 - Sep 2018

- Developed an algorithm in Unreal Engine to accelerate geometric computations used in massive full 3D online game environments with octree and bounding volume hierarchy(BVH)

TEACHING EXPERIENCE

Teaching Assistant, UMD

CMSC132 Object Oriented Programming (2)

MD, United States

Sep 2021 - Dec 2021

Teaching Assistant, SNU

4190.667 Geometric Modeling

Seoul, Korea

Sep 2019 - Dec 2019

Teaching Assistant, SNU

4190.313 Linear and Non-linear Computation Models

Seoul, Korea

Mar 2019 - June 2019

PROJECTS (ALL AVAILABLE ON GITHUB)

MinuteTorus

C++ library that supports basic math operations related to torus : Computing Osculating Toroidal Patch, Computing Binormal Lines between Toroidal Patches, Computing Gaussmaps of Toroidal patches, etc.

MinuteEngine

C++ framework using modern OpenGL that supports basic rendering functions and provides graphics programming environment : Scene graph, Geometry, Lighting, Shading, Texturing, Shadow, etc.

MinuteFreeform

C++ library that supports basic geometric operations related to non-rational freeform geometric entities : Bezier / B-spline Curves, Surfaces, and Volumes

MinuteUtils

C++ library that supports basic math operations related to computer graphics and geometric modeling : Vector, Matrix, Domain arithmetic, Translation and Rotation (Quaternion), etc.

Course Project : Machine Learning and Optimization for 3D data

In this project, I studied and implemented several important topics related to machine learning and optimization for 3D Data : Projection and Camera, Optimization techniques, 3D registration(ICP), 3D Reconstruction, Discrete Differential Geometry, Deep Learning on Point Clouds, Graph CNN, 3D GAN, etc. Specifically, this project aims to do *shape retrieval with spherical bounding volume hierarchy(BVH)*.

Course Project : Advanced Animation

In this project, I studied and implemented several important topics related to computer animation : Affine Geometry, Transforms, Solving Linear Systems, Kinematics, Inverse Kinematics, Rotation and Orientation(Quaternion), Orientation Interpolation, Motion Editing and Blending, Motion Graph, etc.

Course Project : Graphics Programming

In this project, I studied and implemented several important topics related to rendering : Triangle Mesh Processing, Textures, Lights(Point, Area), Shadow, Ambient Occlusion, Deferred Rendering, etc.

AWARDS

Lecture & Research Scholarship

2020

Best Paper Award (Korean Computer Graphics Society, KCGS)

2019

Brain Korea 21 Plus

2019

Samsung Convergence Software Course Scholarship	2017
Eminence Scholarship	2017
National Humanities and Social Sciences and Undergraduate Scholarship	2016
